

Monitoring, Analytics & Dashboards

* IoT Market Size

IoT Global market size is valued at **761.4 billion dollars**
The market in Morocco is estimated at **~ 76 Mds MAD**

15%

Global : 113 billion dollards
Moroccan : 1.13 Mds MAD

Smart Cities

32%

Global 3.2 billion dollards
Moroccan : 325 M MAD

Predictive Maintenance

IoT Market

13.6%

Global : 34 billion dollards
Moroccan : 340 M MAD

Supply chain

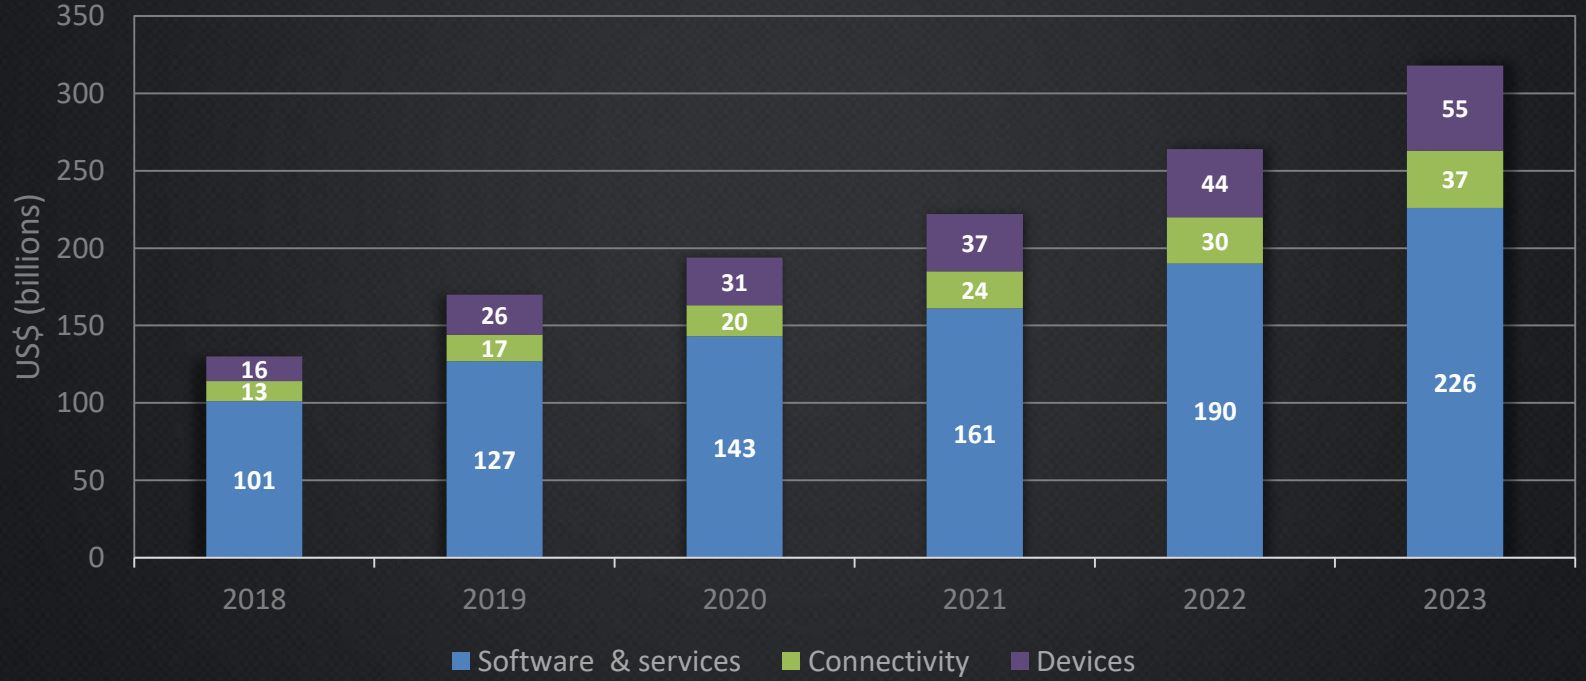

14,7 %

Global : 26.6 billion dollards
Moroccan : 226 M MAD

Smart agriculture

An annual growth rate of **10,5%** per year is expected in the next **5 years**

* Global IoT Revenue By Technology Segment

* Problem

- ❑ Companies need **Centralized views/ dashboards** for monitoring of assets
 - ❑ Need to aggregate data in one Platform - Multiple sources of Data
 - ❑ Users lost – **distracted by multiple Apps** – Scattered Data
- ❑ Generic Solutions
 - ❑ Available IoT solutions **lack the technical oriented features**
 - ❑ Requires synergy between IT and On-field expertise
- ❑ Costly solutions
 - ❑ large investments to interface and extract data from multiple solutions - technically challenging
 - ❑ **Interoperability issues** between platforms

* Solution

- ❑ Accomodating wide range of budgets and technical requirements – Hardware specific to your needs
- ❑ Integrate the know-how of experts of each field
- ❑ Analytics / Optimization / Predictive Maintenance Models – unique approach
- ❑ R&D partners

We combine **hardware**, **business know-how**, **IT** and **ML** to offer you the **optimal solution** to get the maximum value from your **Data**

* Key Differentiators

Partnerships with global entities

Hardware

R&D

Integrated business expertise

We integrate the know-how of our experts in vibration analysis to facilitate the task of spectral analysis, and with them we are part of a continuous development.

Continuous integration of new technologies

* Use cases

Our solution cater to your industry

Fields

Assets

Smart cities

- Automated Meter Reading (water)
- Pressure and quality monitoring (water)

Building

Industrial IoT

- Assets health data monitoring
- Predictive maintenance
- Remote troubleshooting
- Smart alerts and notifications

Industrial equipments

Agriculture

- Sensor data monitoring (temperature, humidity, soil moisture, etc.)
- Remotely controlled irrigation
- Historical data analytics

Farmland

Supply chain

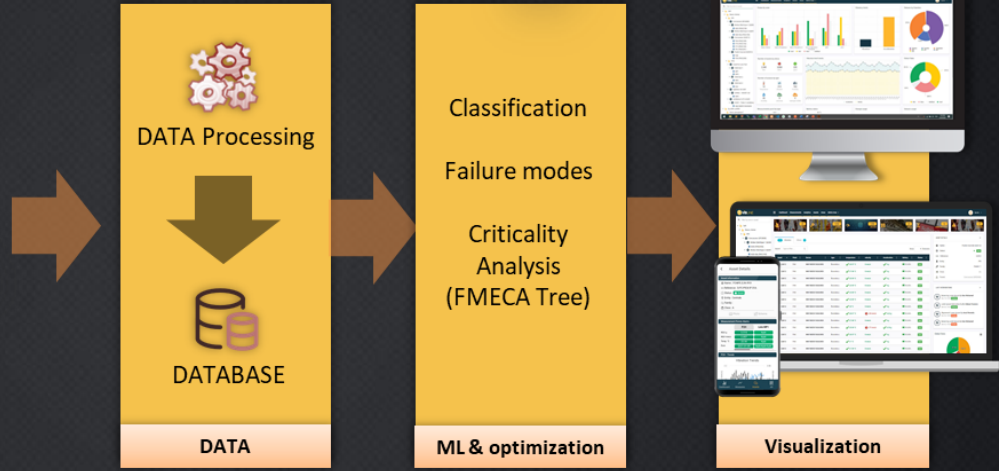

- Follow your fleet and moving asset
- Keep goods under control, from loading to delivery

Truck

* Use case

Predictive maintenance

Integrated data analysis tools

Integrated Analytics Models

Variety of monitoring solutions

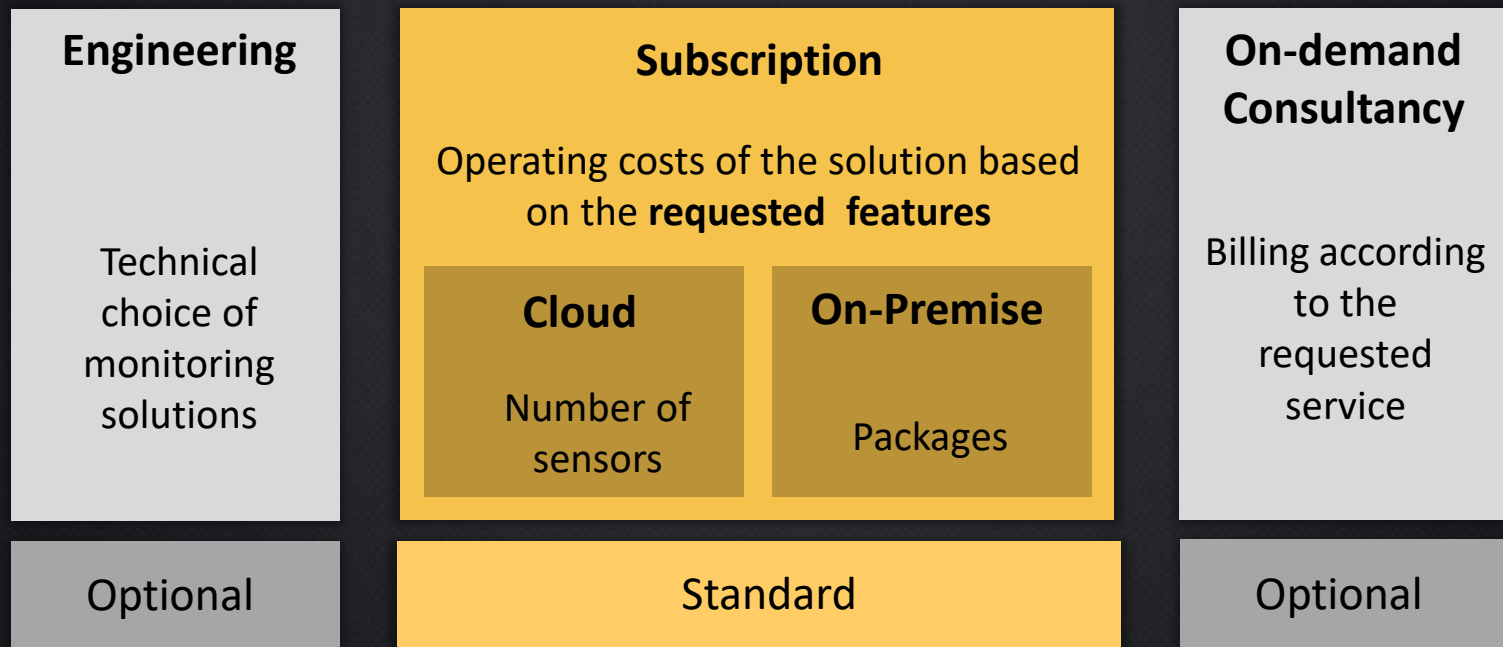

Global dashboards

Interoperability

* Pricing Model

The customer only pays for what he uses

* Target Region

Cloud-based Platform

SaaS-Based Platform

Focus on Moroccan
Market to begin

Expand to Middle
East & Africa

Scale to worldwide

* Projecting the Future

over time we notice the dominance of income generated by software over hardware

* Our team

ELBAZ KARIM
*Project manager
Digital marketing lead*

SADOUQ CHAHINE
Technical Lead

KHATTABI HALA
Hardware/Technical Engineer

AMRANI OMAR
Analytics Lead

EL MEZGUELDI ADIL
Financial consultant

KHADIM SARA
Commercial consultant

BENTOURKI AYMAN
Data scientist / IT Engineer

GRAR MOHAMED
Technical consultant
